PRICE LIST BUDDED PECAN TREES

WIGHT NURSERY *and* ORCHARD CO.

J. B. WIGHT, *Proprietor*, CAIRO, GA.

With Some Valuable
SPECIALS
SEASON 1928-1929

FORTY-ONE years' experience with the pecan has convinced us more and more of its profitableness. The demand for the best nuts is constantly increasing. Trees from fifteen to two hundred years old are annually producing their crops of nuts to the delight both of the palate and pocket-book of their owners. A grove once established, a pound of pecans can be grown more cheaply than a pound of cotton; and the grower has twelve months of the year in which to sell them, and the world for his market.

But if success is to come to the pecan grower, there are certain precautions that must be observed: (1) Strong and vigorous budded trees should be set of such varieties as are adapted to the section where they are to be grown. Avoid stunted trees, for a runt in the nursery will remain a dwarf in the grove. (2) Set trees only on the best land. (3) Cultivate, fertilize, and care for them in the best manner. These are the three most important requisites to successful pecan growing either on a small or large scale. Observe them and you will not be disappointed.

BUDDED PECAN TREES, SEASON OF 1928-1929

SOME FACTS ABOUT OUR TREES

Great care is taken to send out only strong and vigorous trees, which are true to name.

Scions are taken from our own trees, which may be seen growing and fruiting in our groves.

Only strong and vigorous stocks are used for propagating purposes.

Our nursery trees, our orchards and our former customers are our best agents. See them. They speak for themselves.

A cordial invitation is extended to visit our nurseries and orchards of 360 acres located near Cairo. To see is to learn.

All orders are accepted subject to weather and other conditions beyond our control.

Our experience is at the command of those who wish advice as to the best varieties to set in any particular section.

Cash orders receive first consideration. One-fourth of the purchase price should accompany all orders; and this is required on all C. O. D. shipments.

No trees held later than December 1st unless 25% of the price is paid before that date. Privilege is reserved of cancelling without notice all orders not thus provided for. If trees are to be held later than January 15th, payment in full is necessary, unless special arrangement to the contrary is made.

The prices given below are for strong, well-rooted trees, carefully packed and delivered to the express or railroad company at Cairo:

BUDDED PECAN TREES, SEASON OF 1928-1929

PRICES 1928-1929

	1	10	100	1000
2 to 3 feet	\$.65	\$ 5.50	\$ 45.00	\$ 350.00
3 to 4 feet80	6.50	55.00	500.00
4 to 5 feet95	8.00	70.00	600.00
5 to 6 feet	1.05	9.00	80.00	700.00
6 to 7 feet	1.15	10.00	85.00	750.00
7 to 8 feet	1.25	11.00	100.00	850.00
8 to 10 feet	1.50	13.50	125.00	1,000.00

5 trees go at 10 rate, 50 at 100 rate, etc.

VARIETIES

We are testing about forty of the most promising varieties of pecans. The following we consider among the best of these:

Stuart is an old favorite that has been widely tested. This is a safe variety to plant and succeeds over a wider territory than probably any other variety.

Schley is placed by some at the head of the list. It is a large, thin-shelled nut of fine flavor, and is well filled with meat. Liable to scab near the coast.

Frotscher is a large, thin-shelled nut, which has been widely planted. Placed by some at head of list of profitable varieties.

Moneymaker is an early and prolific bearer, and a healthy, vigorous grower. It is proving a very profitable commercial variety. Rapidly growing in favor.

Success is a nut of fine flavor. Originating in Mississippi, it has been widely disseminated during the last few years.

Pabst is a safe nut; and while not quite so large as some of the above, yet it is a good bearer, and one can hardly make a mistake in setting it.

Moore is of medium size; a vigorous and healthy grower; very early and prolific bearer.

BUDDED PECAN TREES, SEASON OF 1928-1929

Nelson is probably the largest pecan grown. It is a strong, vigorous grower, and an early and prolific bearer. Its shell is thick.

If in doubt as to the best varieties to set, this, when left to us, will receive our careful attention, thus insuring a better selection than an inexperienced grower could make for himself.

The transplanting season extends from the middle of November to the early part of the following March. Other things, however, being equal the earlier in the season trees are set the better and more promptly they grow off the following season.

OTHER FRUITS

We list here a few valuable fruits which are easily grown and are among the best in their line:

Satsuma Oranges, Grapefruit and Kumquats. These are grown on *Citrus trifoliata* stock and readily succeed in this and corresponding latitudes. Price 50c to \$1.00 each, owing to age.

Winesap Plum. A splendid new variety, most promising. Price, 50c.

Morrill Grape. Vigorous and productive. Price, 25c to 35c.

Pineapple Pear. 45c to 65c each.

Peaches. The leading varieties adapted to this section. Price, 30c to 50c.

Japan Persimmons. Tane-Nashi, Tamopan, and Fuyugaki. Price, 35c to 65c.

ORNAMENTALS

We can also furnish the leading varieties of roses, crape myrtle, azaleas, abelia, ligustrum, viburnum, camellia, nandina, pittosporum, also junipers and arborvitae and some of the best adapted deciduous trees and shrubs.

Address all orders and communications to,

WIGHT NURSERY & ORCHARD CO., Cairo, Ga.
